To-do (0 tasks)

Do today (0 tasks)

In progress (0 tasks)

Done (10 tasks)

Implement the game functionality in nuxtJS		Implementational tasks
Points estimate: 0	Time spent: 7h 23m	Grouping date: 16 September 202

Small Fixes&Changes		Implementational tasks
Points estimate: 0	Time spent: 1h 26m	Grouping date: 16 September 202

Plan the structure of the dev environment		Foundational tasks
Points estimate: 0	Time spent: 6h 22m	Grouping date: 16 September 202

Writing the Development Plan		Documentational tasks
Points estimate: 0	Time spent: 4h 32m	Grouping date: 16 September 202

Implement the front-end based on the wireframes in Bootstrap — Implementational tasks

- The bootstrap Framework is already integrated with NUXT.JS by this point.

Points estimate: 0	Time spent: 2h 26m	Grouping date: 13 September 202

Implement the environment		Foundational tasks
Points estimate: 0	Time spent: 0h	Grouping date: 11 September 202

Plan the rough structure of the codebase		Foundational tasks
Points estimate: 0	Time spent: 0h	Grouping date: 11 September 202

NuxtJS Read&Play Foundational tasks

Implement the blog:

- https://nuxtjs.org/blog/creating-blog-with-nuxt-content/
  Convert the blog to
- https://www.freecodecamp.org/news/how-to-use-flat-file-data-in-a-static-nuxt-app/
- https://www.codeply.com/go/qhaBrcWp3v

- Important:

- https://www.codeply.com/go/qhaBrcWp3v
- https://medium.com/js-dojo/how-to-create-an-animated-countdown-timer-with-vue-89738903823f
- https://dev.to/rachel_cheuk/timer-component-for-vue-js-3aad
- https://codepen.io/edscode/pen/QXXowy
- https://scotch.io/bar-talk/build-a-pomodoro-timer-with-vuejs-solution-to-code-challenge-6
- https://github.com/TylerPottsDev/vue-timer-app
- https://codepen.io/gau/pen/LjQwGp
- https://github.com/robinvdvleuten/vuex-persistedstate
- https://www.npmjs.com/package/nuxt-vuex-localstorage

Need To Know Questions:

- How do I show the searched words which do not match with anything? (ok)
- How do I create a clock/timer? (ok)
- How do I show, the date? (ok)
- How do I show, the name? (ok)
- How do I pass the name data between components? (ok)
- How do I show the searched words which do not match with anything? (ok)
- How do I trigger the modals from different parts of the code?
- How do I write into a file the (username, date, time, word, point) information (ok)
- How do I read from that file and load the data into a table? (ok)
- How do I show, the clock/timer?(ok)

- Is the point count is the best in the mounted method section? (Review Later)
